

# SuperStun™ 8525K 18-inch Electric Baton

Our Model 8525K SuperStun™ Electric Baton is available in 4 peak voltages, none of them lethal. The lowest voltage is for security guard duty, the highest for military use. The difference is in the degree of pain and the length of the after-effects.

Touching the opponent's body (torso is best) has the following effects:

- Within 1/4 second, muscle spasms and extreme pain
- Within 1/2 to 2 seconds, loss of muscle control and balance
- Within 1 to 3 seconds, immobilized for 1 to 5 minutes, remaining dazed and disoriented for 5 to 20 minutes

These effects works equally well through thick clothing and leather.

U.S. Design Patent  
 No. 289,313

Complies with US Electrical  
 Safety Standard IEC529

Five-Year Replacement  
 Guarantee

For faster service in  
 obtaining the required  
 government import and export  
 permits this product is

**Designed in the USA  
 and assembled in Taiwan**
